

THE BOUNCER

Connecting parking spaces to
the future, today.

LAZ Parking's Bouncer is a secure service that connects LAZ locations to digital sellers and grants online customers fast and easy access.

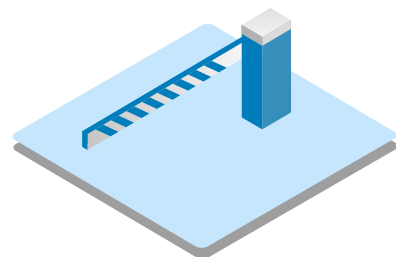

**MANY PARKING SELLERS,
ONE INTEGRATION**

Bouncer is a secure API layer where sellers can get live LAZ parking rates. Parking, map & ticket apps and connected cars can show their customers our One Time & Subscription parking products in real time.

**ONE SECURE PARKING
EQUIPMENT CONNECTION**

Bouncer intelligently consolidates all sellers' transactions to the LAZ location equipment, so no matter where customers bought their parking, the gate will go up or the enforcement officer will approve.

**WELCOME WHO YOU WANT,
KEEP OUT WHO YOU DON'T**

Sellers come and go, commissions change. With a single connection point, we can manage your pricing and inventory for all sellers in just one place - or switch them on or off with the click of a mouse.

With every connected car and mapping app looking for parking, only The Bouncer puts you **ahead of the competition** and on the screens of **millions of future customers**.
