

ONE TIME CENTER

(formerly GRS)

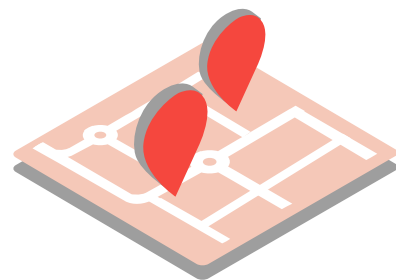

Sell your spaces **online, everywhere** customers look for parking.

LAZ One Time Center is the most flexible and scalable transient parking eCommerce platform, controlling pricing and inventory for all sellers in one secure place.

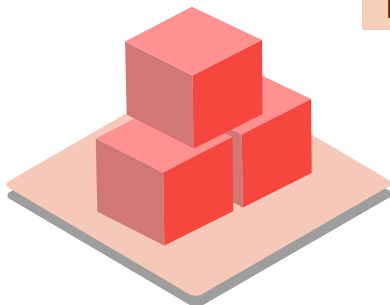

YOUR PARKING PIN ON EVERY MAP

Our "Rates in the Cloud" enable LAZ to manage and sell your transient parking anywhere - direct through LAZgo, or via Bouncer integration to parking & map apps, ticket sellers and connected cars.

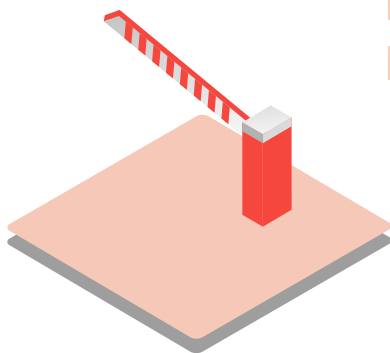

EVERY SELLER'S TRANSACTIONS IN ONE PLACE

Transient eCommerce data automatically flows to LAZ Business Intelligence for analysis and action. Managers can make pricing, inventory or blackout changes on the spot - no calls or emails required.

EFFORTLESS CUSTOMER ACCESS

No matter where they bought parking online, paid customers get the same easy access to LAZ locations. And if they need assistance, LAZ Customer Care is expecting them and can review their purchase.

One Time Center gives parking managers **centralized control** over a location's entire online profile, enabling accurate, wholistic and **up-to-the-minute pricing** and inventory decisions.
